PROFESSIONAL SUMMARY

Computer Science student passionate about full-stack development and AI-powered applications. Experienced in building Flutter mobile apps, REST APIs with Django and FastAPI, and machine learning pipelines. Completed a Final Year Project (PFE) developing an ERP mobile application with an AI-based stock prediction module, successfully defended in June 2026. Eager to contribute to innovative professional environments.

PROFESSIONAL EXPERIENCE

Mobile & AI Developer Intern

Feb 2026 – May 2026 (4 months)

YUCCAINFO | Sousse, Tunisia

- Developed a Flutter mobile application for ERP management (quotes, orders, products) using MVVM architecture.
- Designed and implemented an AI-based stock prediction module using LightGBM for alert classification (CRITIQUE / BAS).
- Built and deployed a FastAPI microservice for the AI pipeline, containerized with Docker.
- Integrated FCM push notifications for dual-channel alerts (ERP & AI) on Android devices.
- Contributed to improving and extending an existing Django REST Framework backend.
- Resolved Git merge conflicts, debugged Docker networking issues, and managed Supabase/PostgreSQL data layers.

Software Development Intern

Aug 2025 – Sep 2025 (2 months)

SaiKet Systems | Remote

- Built a customer churn prediction model using Random Forest on a telecom dataset, improving accuracy and enabling proactive retention strategies.
- Performed data preprocessing, feature selection, and model evaluation, enhancing model reliability and providing actionable insights.
- Delivered recommendations that supported customer retention initiatives, reducing churn risk and improving loyalty.

App Development Intern

Jul 2024 – Sep 2024 (2 months)

CodeAlpha | Remote

- Built full-stack web applications with a focus on the MERN stack (MongoDB, Express.js, Node.js, React).
- Developed scalable and user-friendly features across both frontend and backend.

EDUCATION

Licentiate Degree in Computer Science

2024 – 2026

ISIMM – Higher Institute of Informatics and Mathematics of Monastir

TECHNICAL SKILLS

Mobile Development

- Flutter (MVVM), Dart, Firebase FCM, Android SDK

Backend & APIs

- Django REST Framework, FastAPI, Node.js, Express.js

AI / Machine Learning

- LightGBM, Feature Engineering, Time Series Forecasting, Scikit-learn

Frontend

- React, HTML, CSS, JavaScript

Databases & DevOps

- PostgreSQL, Supabase, MongoDB, Docker, Git

Methodologies

- Agile / Scrum, TDSP

CERTIFICATIONS

- AWS Academy Cloud Foundations – AWS
- Building LLM Applications with Prompt Engineering
- Computer Vision Certificate – NVIDIA

LANGUAGES

Arabic : Native

English : Professional

French : Professional
